

PRACTICE CONTACTS

- Matthew Gonzalez
- Jason Reeves

Zelle advises on disputes arising out of some of the most significant construction and engineering projects in the world. We handle high profile and routine engineering and construction disputes: the world's largest TBM, roads, bridges, tunnels, railways, petrochemical, refineries, power plants, hydroelectric plants, renewables, blast furnaces, ports, buildings, commercial property, food processing and agricultural property, and industrial property.

We advise on projects in North, Central and South America, the United Kingdom and Europe, and the Middle East governed by U.S., English, and foreign laws.

We provide coverage and measurement analysis on All Risk, EAR, CAR, and Builder's Risk policies. We regularly advise on corrosion, pollution, losses arising from defects, the interpretation and application of DE and LEG clauses, and DSU/ALOP.

Our engineering and construction lawyers practice in a range of U.S. states, England & Wales, Spain, and China. We have a network of trusted local counsel in foreign jurisdictions.

REPRESENTATIVE MATTERS

A series of COVID-19 claims

>\$350m refinery construction dispute in Texas

>\$600m tunnel project involving breakdown of tunnel boring machine

\$220m highway project in Israel

Highway project in Indiana

A series of power and hydroelectric plant claims in Central and South America

Port construction claim in Brazil

Electrical power station losses in North Dakota, Colorado, Nebraska and Nevada

Municipal waste water treatment plant in Minnesota

Builder's Risk

Major chemical plant hazardous material incineration system in Michigan

Pipeline construction failure due to design deficiencies

Matters involving trash to steam plants both for coverage and subrogation

Turbine (including wind turbine) losses

Solar plant project in Spain
